COMPANY OVERVIEW

About Us

Reliant Systems Limited is a leading provider of electrical and electronic engineering services, as well as professional consultancy solutions across Africa. We are widely recognized for our innovation, quality products, and commitment to customer satisfaction. As a trusted partner to companies and organizations, we design, install, monitor, and service integrated security and smart technology solutions tailored to their unique needs.

Our goal is to help businesses operate more intelligently, securely and efficiently while ensuring they stay ahead with the latest technology and personalized support. At the same time, we remain dedicated to supporting families by delivering smart home solutions that make everyday living safer, more convenient, and truly connected.

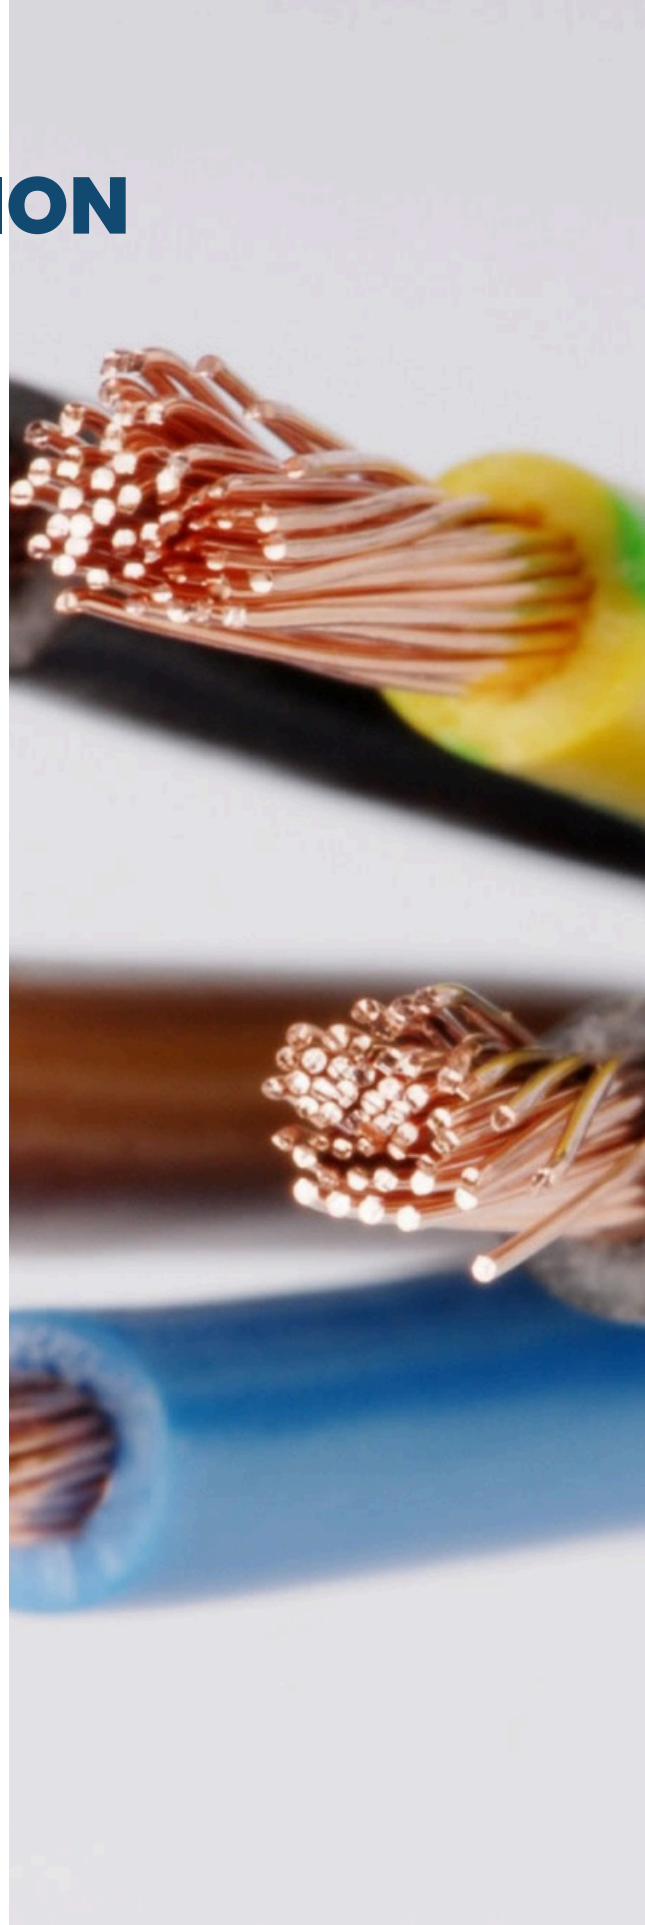

OUR VISION & MISSION

Our Vision

To be Africa's most trusted provider of innovative electrical, security, and renewable energy solutions that empower safe, connected, and sustainable communities.

Our Mission

To deliver reliable and secure engineering solutions through innovation, teamwork, and excellence — ensuring every client receives high-quality, value-driven services in electrical, security, and renewable energy systems. We are committed to continuous improvement, strategic partnerships, and fostering customer confidence through integrity and professionalism.

OUR CORE VALUES

Compassion: We put empathy first by preserving individual rights and providing excellent service.

Innovation: We are visionary and embrace the challenge of developing creative solutions to complex problems.

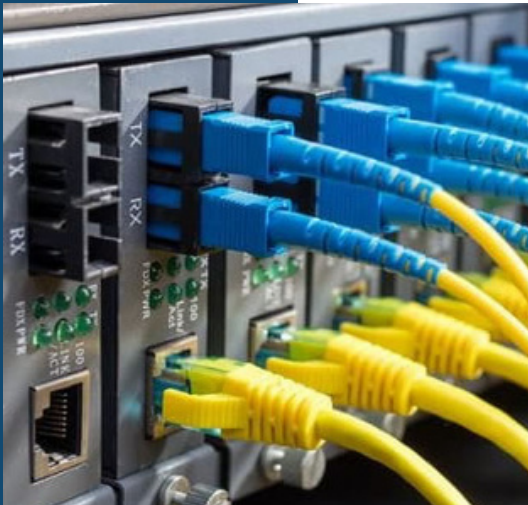

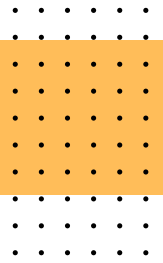

Commitment: We are dedicated to the success of our clients by constantly driving value within their business.

Teamwork: We leverage our team's diverse experience and collaborate with world-class partners to deliver exceptional results.

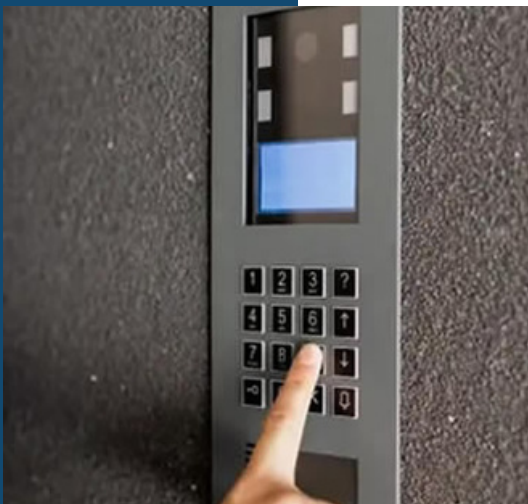

WHAT WE DO

Structured cabling

Structured cabling forms the backbone of reliable network infrastructure. We provide an organized, scalable, and high-performance system for data, voice, and video communication, ensuring seamless connectivity and efficient information flow across your organization.

Audio phones & video intercoms

We have the latest intercom and video phones, both hard wired and wireless, suitable for homes, apartments and offices. Some have inbuilt recorders to counter criminal activities.

CCTV surveillance

We supply and install IP network CCTV video systems including 4K and full HD video security cameras in vandal dome, bullet, box or PTZ camera formats.

WHAT WE DO

Access control systems

We provide customized access control solutions to meet diverse requirements, including HID, biometric, facial recognition, and proximity systems – all seamlessly integrable with various locking mechanisms such as electromagnetic, bolt, and strike locks.

Intruder alarms

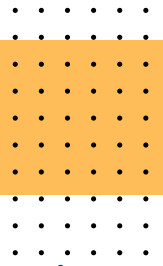

Intruder alarm systems are essential for detecting and deterring unauthorized access. We design, supply, and install reliable alarm solutions tailored to ensure early detection and enhanced protection for homes and businesses.

Fire detection systems

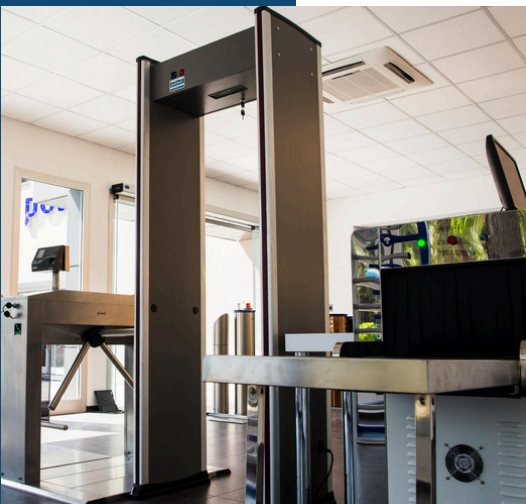

Our fire detection systems solutions range from basic conventional systems to advanced addressable fire alarm technologies, providing safety and peace of mind for residential, commercial, and industrial spaces.

WHAT WE DO

Bollards & under vehicle screening

Our bollard and under-vehicle screening systems enhance security and traffic control by preventing unauthorized access and enabling efficient vehicle inspection in high-risk areas.

Metal detectors & scanners

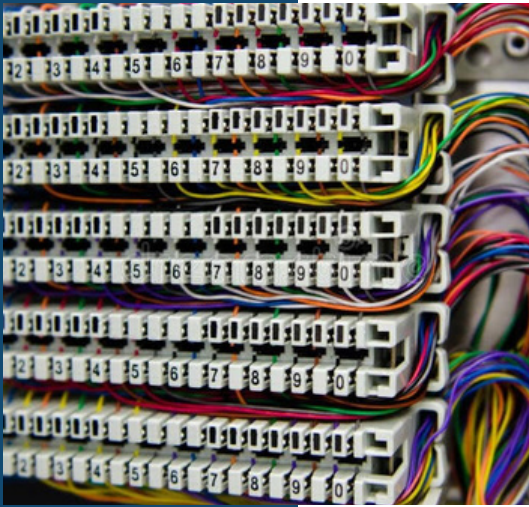

We supply and install a wide range of metal detectors and scanners, including walk-through, handheld, and X-ray systems, designed to enhance security screening and ensure safety in public and private facilities.

Electric fence & perimeter razor wires

Our electric fencing and perimeter razor wire solutions provide robust protection against intrusion offering an effective physical and psychological barrier to enhance the security of residential, commercial, and industrial properties.

WHAT WE DO

Block wiring / PABX

We offer professional block wiring and PABX solutions that ensure efficient internal communication within homes, offices, and apartment complexes. Our systems are designed for clarity, reliability, and seamless integration with existing telephony and communication networks.

Solar systems

We enable individuals and businesses to switch to solar energy supplying, installation and servicing of solar PV systems, solar water heaters, power backup systems, water pumping solutions etc

Other services

- Project management
- ICT & security and renewable energy
